Unique Automotive Environments for the Discerning Enthusiast

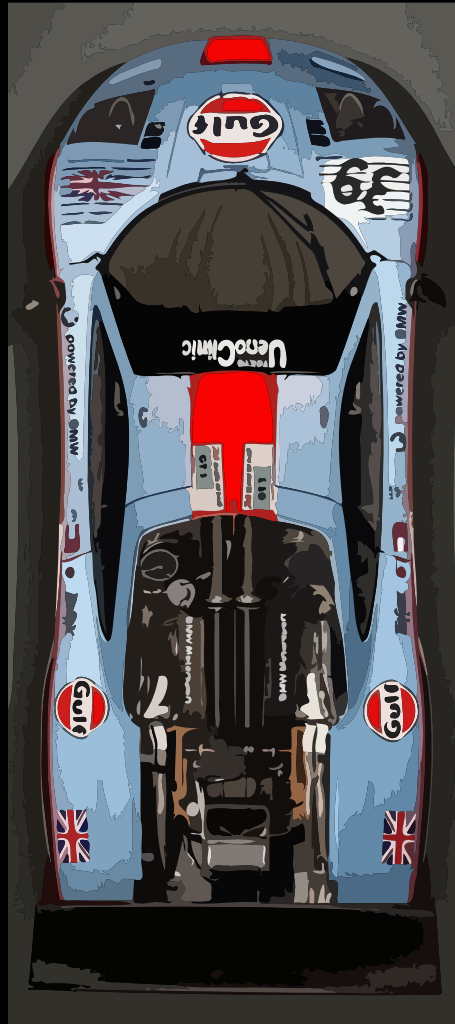

CAR GUYS

It's That Simple

Well maybe not that simple but we are a group of hard working designers that love cars!

We have designed and fabricated for many decades all types of retail buildings including carwashes, convenience stores, express lubes, stores, offices, shade structures etc. In doing all that our founder, Timothy Hogue, wondered why he couldn't build himself a garage out of the same super strong tubular steel framework and materials that he used on the commercial buildings.

Why not design and fabricate a high style garage that did

not look like every pole barn (no harm meant to pole barns) and was far superior in strength and durability to a pole barn (really we are not putting down pole barns) so that is what he set out to do.

Our clients come from all walks of life but have one thing in common. They love their cars and they like to spend time with them. They want a space that is uniquely theirs. It is their place of solace.

Whether you place a car in yours or not is entirely up to you.

You can use your building to house whatever you love the most. Cars, art, knitting etc.

Lets get started!

PARK IT

What Is A Garage

Let us wax philosophical for a moment, just what is a garage?

Well to us here at Metron it is a space in which you surround yourself with the things you love.

Your treasured finds, your collections, your hobbies, the things in your life that provide solace.

That maybe cars or watches or cigars or artwork or knitting. (well maybe not knitting) but this space we build is specifically for you.

Just you.

This is your fortress of solitude, your bat cave, your solace.

And in a world full of other noise, it is incredibly important to have your space. Your garage.

We take designing your garage very seriously because it is an important part of your existence. And when your as serious about your enjoyment as we are we know that we have found kindred spirits.

Because it's not just a garage is it?

It is a whole lot more!

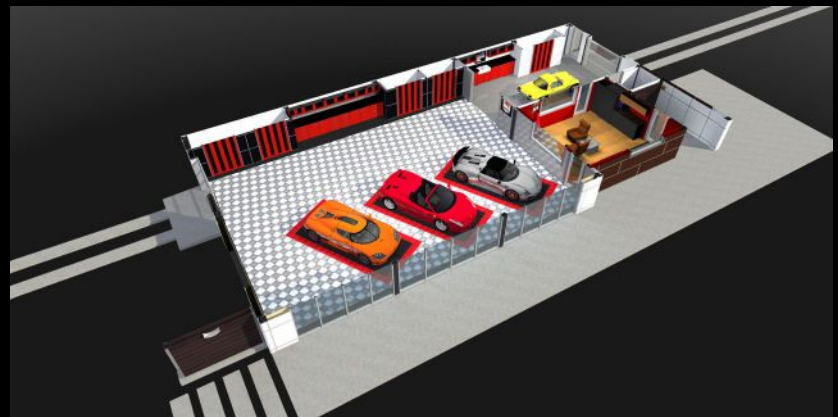

Timothy Hogue, Founder, Committed Car Guy,

1.800.511.7208

We feature 3D Layouts, Overviews and Animations to better help you visualize your new building.

You will be able to visualize the layout of your building and see specific areas that you want to have showcased.

At Metron we use groundbreaking, modern Building information modeling (BIM) 3D software to design your building to fit your style and needs. You will be able to see renders that accurately portray your new building. We even prepare walk through animations just so you see the building as it will be in reality!

METRONgarage

Exterior Wall Cladding - ACM Panels

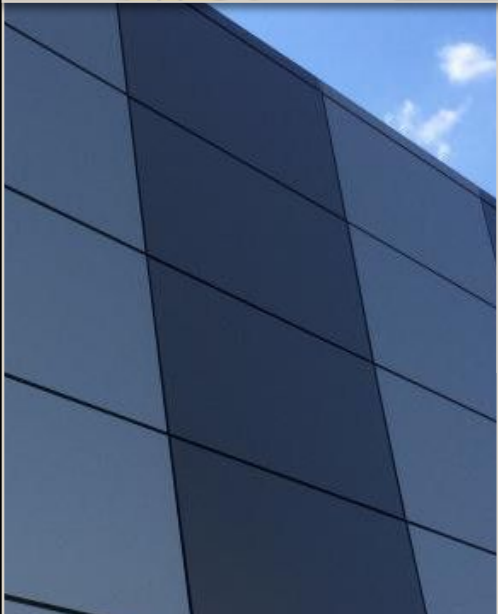

ACM Rout and Return System

ACM Reveal System

ACM Rout and Return System

ACM Reveal System

- We offer multiple Aluminum Composite Panel Cladding System to give your building a definitely upscale design.
- The Rout and Return Dry Seal is a more expensive ACM System but provides an upscale look with a true rain screen function.

METRONgarage

Exterior Wall Cladding - Fiber Cement Panels

Fiber Cement System

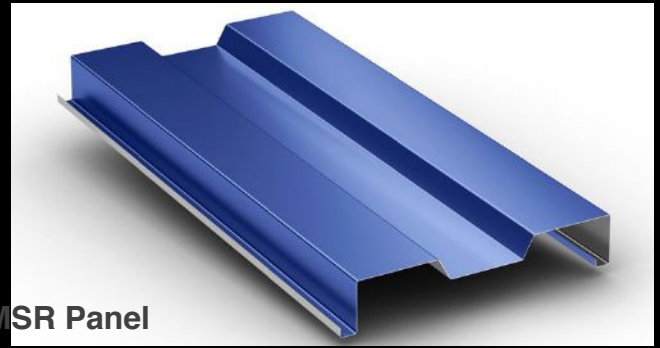

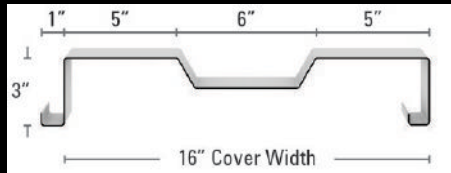

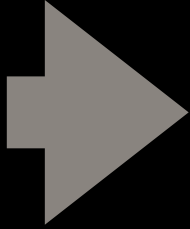

Panels or Boards

We offer a Fiber Cement Panel that works with our Reveal System. This panel is a very strong, durable cement cladding material that can be painted to match any color. This Panel can be used to meet the city recommendations of masonry material requirements.

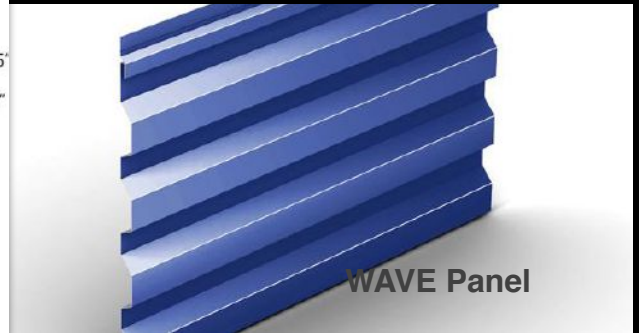

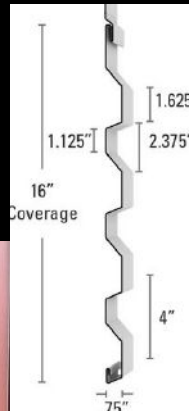

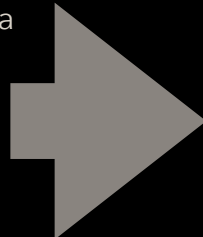

METRONgarage

Exterior Wall Cladding - Metal Panels

MSR Panel

We offer architectural steel panels for cladding areas where more economical panel would be preferable or perhaps a more industrial look is desired.

WAVE Panel

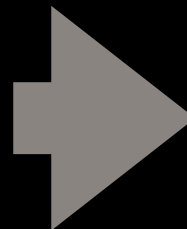

MFW Panel

MFW Panel

The Metron MFW Panel is an especially flexible cladding as it can have many different looks based upon the reveal spacing and or placing it in a vertical or horizontal orientation

Steel It

METRONgarage

Exterior Wall Panels - Wood Design

Wood Designs MSW

We utilize a phenolic panel that resembles multiple wood designs. These panels are made from a durable phenolic resin and multiple decorative levels which are cured under pressure. The result is a super strong non porous wall cladding that mimics the benefits of wood without the issues. They can be installed with either an exposed fastener system or a concealed fastening system.

METRON garage

Interior / Exterior Stone

We offer multiple Stone Systems for the interior as well as exterior of your building. These are all made to mechanically fasten so that they will install quickly without the need of a stone mason.

The systems are a durable cultured stone as well as an option for a high grade of high-density polyurethane that mimics very complex stack designs.

Throw Some Rock At It

METRONgarage

Daylight Wall / Polycarbonate Light Panels

Light It

A really interesting and cool option that we offer is the Multi Wall Polycarbonate Light Wall Option.

This option is great for a wall section of your building, a Tower element, or some other area that you would like to highlight.

The Polycarbonate panels are translucent allowing light from inside the building or customize light modules placed behind or within the wall system to glow.

This option can be used to highlight a certain area or architectural element of your building.

This goes one more step further to make your building truly unique.

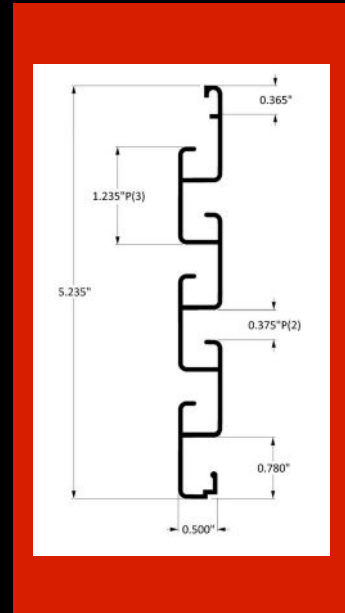

METRONgarage

Interlocking Aluminum Slat Wall

Wood Tones as well as
Brushed Aluminum also
available

Heavy Duty

Our Interlocking Aluminum Slat Wall Panel is super tough and can handle your heavy storage loads!

This is a shelf mating system that interlocks allowing you to stack as tall as you need. The material comes in mill finish ready to use as is for a modern industrial look or you may paint it to match an accenting wall color or trim.

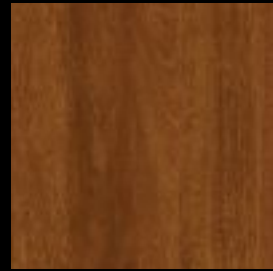

Made from 6063 T5 Aluminum. 5' and 10' lengths available.

METRONgarage

Interior Wall Cladding

Panasphere Premium Interior Wood Finish Panels and Trims

We offer the Panasphere line of premium wood panel finishes that can be used in the areas of building that you may want a warm upscale finish. These can be cut and placed in a pattern to create interesting wall sections.

METRONgarage

Interior Retail Wall Panels

Many Different Designs

You can achieve multiple design aesthetics with our Retail Wall Panel System.

The system is available in Wall Panel Sections as well as our popular Slat Wall Configuration which makes your walls work for you.

Create interesting display / storage areas by combining both panel types as well as various styles that blend together to create a highlight wall.

METRONgarage

Waterproof Wall Panels

M-Board

What is M-Board?

Well that is an excellent question and we will try to give a good definition.

It is a Magnesium - Based Panel Material that is: heat resistant, fire resistant, has extreme stiffness, and is a super durable, waterproof board that can be used as sheeting on the outside of your building envelope,

It can also be used in place drywall for your finished wall areas.

Anywhere that water or mildew could be a concern, you should consider M-Board.

- Impervious to Water
- Dimensionally Stable
- Structural when wet
- Does not warp
- Does not swell
- Does not delaminate
- Class A1 fire rated
- Completely Inorganic
- No termites
- No wood boring insects

LED Channel Letters / Signage

If you like us we like signs in our garage.

Lots of signs. We make custom LED internally lighted channel letters and even logo designs for many of our clients, this is a way to personalize their space as well...theirs!

These are the same commercial heavy duty signs that we provide in our commercial retail buildings. They are built to provide years of service.

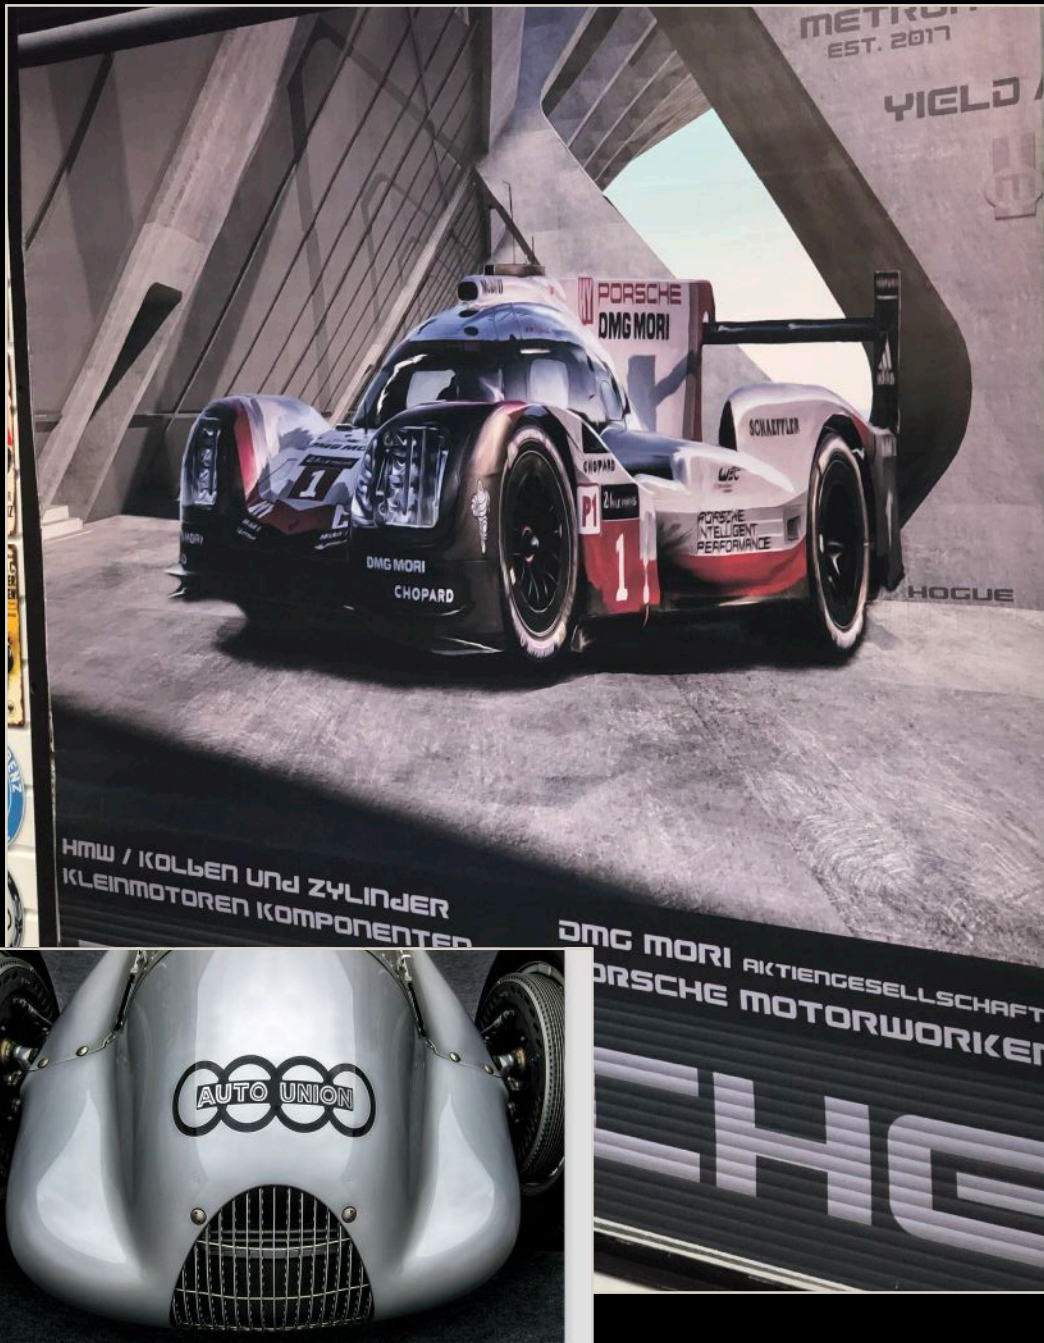

You may put our signs inside your building or outside. They are UL listed and weather proof.

You can really put the personal touch on your new garage!

Name It

METRONgarage

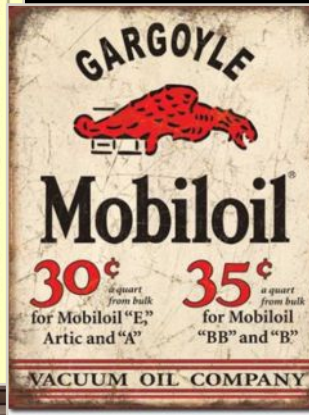

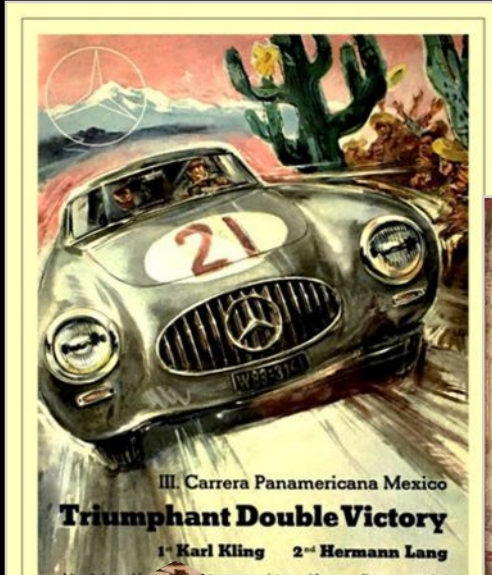

Large Scale Custom Artwork

We also offer custom large art commissions that are customized to your vehicles / brand. These can be backlit, mounted on metal panels, canvas or prepped for vinyl application. Ask your Representative for details.

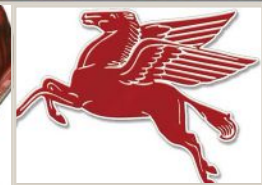

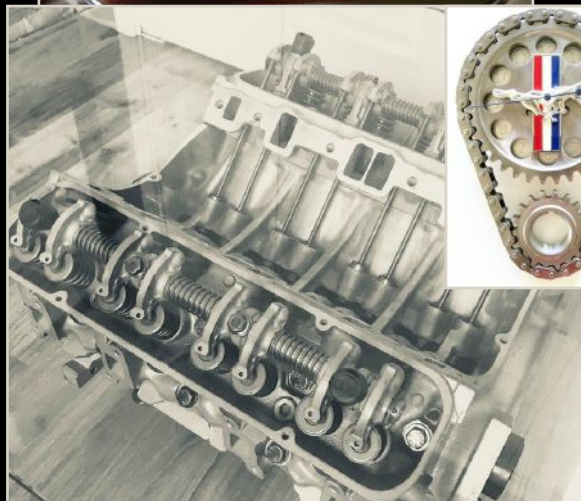

METRONgarage

Artifacts / Display

In our travels we find all sorts of interesting Automobile Memorabilia that help to personalize your space.

There are too many items to catalog but as we work together we would love to make reconditions (based on your car love) of items that might really add to your design.
